

# THE NEWGREN COMPANY

## PARTS AND SERVICE BULLETIN

NO. 4

DATE May 8, 1947

SUBJECT: HYDRAULIC LINKAGE SYSTEM  
(Hydraulic Pump Drive)

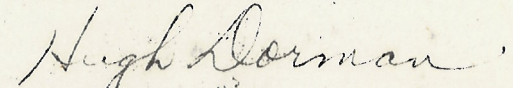

TO ALL NEWGREN DISTRIBUTORS:

The NEWGREN Company has developed a new, more superior type of drive for our hydraulic linkage system. The attached drawing shows the drive as disassembled.

This drive will be sent to all distributors to place in stock for replacement where necessary. We will send replacement stock for all hydraulic linkage systems, serial numbered from #2000 to 3403 inclusive.

A special crankshaft wrench is available from the NEWGREN Company for \$1.50 net. This is the only special tool required to install the new drive.

Yours very truly,

Hugh Borman  
Sales Department
